FULL-STACK WEB DEVELOPER

Graduate of Flatiron School in software engineering. I love creating front-end web applications using vanilla CSS and clean and neat UI to be more user friendly. Knowledge of creating back-end to serve front-end applications through the use of data storage, API requests, as well as knowledge of MVC programming

TECHNICAL PROJECTS

Airline Tracker | [GitHub](#) | [Live Site](#)

Airline flight tracker to view current status of upcoming flight.

- Built backend on Express.js framework handling external API calls
- React frontend for UI
- Redux for state management

Anna Dahlia Photography | [Github](#) | [Live Site](#)

Photographers portfolio showcasing photos from the photographer.

- Built using React component library
- Local storage used for collection of images.
- Image showcase

Guitar Picks [Github](#) | [Live Site](#)

Allows users to submit pictures of guitars and rate them.

- Created web app using vanilla JavaScript and Rails backend for data storage (PostgreSQL)
- Implemented simple login functionality which validated existing users and allowed for adding of new users
- Leveraged JavaScript event listeners to fetch data to and from Rails backend

TECHNICAL SKILLS

Javascript, React, Redux, MongoDB, Express.js, Ruby on Rails, PostgreSQL

EXPERIENCE

Cargill   11/2010 - 12/2015,   01/2017- Present

Cargill is a leading manufacturer of value-added processed egg products for distribution to foodservice operators, schools, the US military, and institutional organizations, as well as consumer food manufacturers throughout the US. Held various roles of increasing responsibility (Team Member, Team Specialist, and Team Lead) in multiple departments including Sanitation and Food Production.

- Support supervisor/lead in scheduling, team building, training, and employee relations.
- Perform data entry in SAP inventory management system to support transfer of inventory between warehouses
- Handle various aspects of the production process including all steps beginning with receipt of raw food product and ending with packages ready to be palletized for shipping to warehouses.
- Developed spreadsheets to support daily tasks, checklists, and to provide additional information for supervisors.
- Handles training with rigorous, yet intuitive training regimen
- Learns processes through its entirety
- Excels at communicating action plans, maintenance requests, and follow-ups with owner or the project
